

WHAT IS CLAIMED IS:

Sub A1 7  
1 1. A computer-implemented method of providing a graphical user  
2 interface (GUI) in a poetry generation system comprising:  
3 displaying a work space;  
4 receiving a user input to the word space; and  
5 linking the user input to a plurality of poet assistant  
6 windows.

1 2. The computer-implemented method of claim 1 wherein the work  
2 space is derived from executing a word processing program.

1 3. The computer-implemented method of claim 1 wherein the user  
2 input is a word.

Sub A2 7  
1 4. The computer-implemented method of claim 1 wherein the  
2 plurality of poet assistant's windows comprise:  
3 a next word window;  
4 a finish line window;  
5 a finish poem window;  
6 a rhyme word window; and  
7 an alliterative window.

1 5. The computer-implemented method of claim 1 wherein each of  
2 the plurality of poet's assistant windows comprise a poet  
3 personality.
